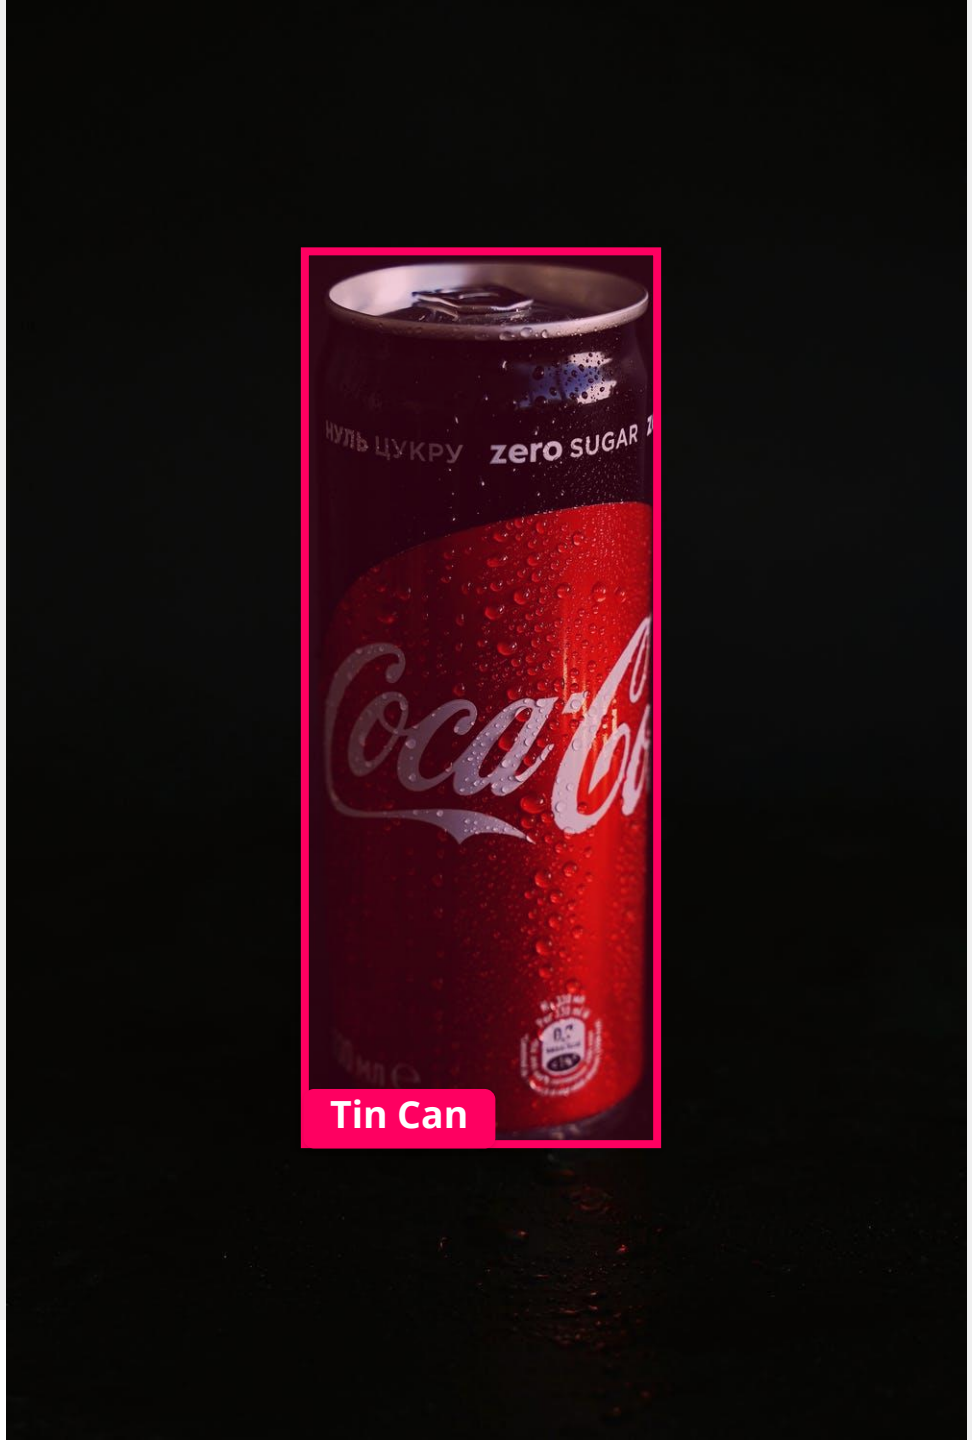
MODULE 4 – CUSTOM DATASETS

Custom Datasets Activity

1 **Use the Toolkit in CMD**

2 **Download 10 images**

- **Coffee**
- **Tin can**



Custom Datasets Activity

- Do you remember the rule that we implement when we have class that consists of two words or names?
- How do we limit number of images to download for every class?
- How do we specify which dataset to download?
- How do we say that we want all classes in one folder?
- And finally, How does your command and arguments look like?
